Duration	4 mins 38 secs
Grade	**12.00** out of 15.00 (**80**%)

Question **1**

Correct

Mark 1.00 out of 1.00

What is the time complexity of binary search in the worst case?

a. O👎

b. O(log n) ✓

c. O(1)

d. O(n log n)

Question **2**

Correct

Mark 1.00 out of 1.00

During a binary search, what happens if the target element matches the middle element?

a. The search continues in the left sublist

b. The search ends successfully ✓

c. The list is sorted

d. The search continues in the right sublist

Question **3**

Incorrect

Mark 0.00 out of 1.00

What happens in a binary search if the list has an even number of elements?

a. The search stops

b. The middle element is chosen randomly

c. The higher middle element is chosen as the middle element

d. The lower middle element is chosen as the middle element ✗

Question **4**

Correct

Mark 1.00 out of 1.00

In binary search, how is the middle element determined?

- a. By starting from the first element
- b. By using a hash function
- c. By comparing each element sequentially
- d. By dividing the list length by two ✓

Question **5**

Correct

Mark 1.00 out of 1.00

The average case occurs in the linear search algorithm

- a. When the item is the last element in the array
- b. When the item is somewhere in the middle of the array ✓
- c. Item is the last element in the array or item is not there at all
- d. When the item is not the array at all

Question **6**

Correct

Mark 1.00 out of 1.00

Which of the following is a conventional searching technique?

- a. Hashing
- b. Binary search
- c. Dynamic search
- d. Linear search ✓

Question **7**

Correct

Mark 1.00 out of 1.00

_____sort is the simplest sorting algorithm that works by repeatedly swapping the adjacent elements in case they are unordered in n-1 passes.

a. Complexity

b. Insertion

c. Bubble ✓

d. Selection

Question **8**

Incorrect

Mark 0.00 out of 1.00

Given an array arr = {45,77,89,90,94,99,100} and key = 99; what are the mid values(corresponding array elements) in the first and second levels of recursion?

a. 89 and 94

b. 90 and 99

c. 90 and 94 ✗

d. 89 and 99

Question **9**

Incorrect

Mark 0.00 out of 1.00

What is the first step in binary search?

a. Divide the list into two equal parts

b. Sort the list ✗

c. Compare the target element with the middle element in the list

d. Compare the target element with the first element in the list

Question **10**

Correct

Mark 1.00 out of 1.00

What is the best-case time complexity of linear search?

a. O(log n)
b. O(1) ✓
c. O🥊
d. O(n log n)

Question **11**

Correct

Mark 1.00 out of 1.00

If the target element is greater than the middle element in binary search, where does the search continue?

a. In the left sublist
b. In the right sublist ✓
c. At the beginning of the list
d. In the middle of the list

Question **12**

Correct

Mark 1.00 out of 1.00

Which method of searching involves sequentially comparing each element until a match is found?

a. Linear search ✓
b. Binary search
c. Jump search
d. Hashing

Question **13**

Correct

Mark 1.00 out of 1.00

What happens when the element is found in linear search?

a. The search backtracks to find duplicate elements
b. The search stops immediately ✓
c. The search starts over from the beginning
d. The search continues until the end of the list

Question **14**

Correct

Mark 1.00 out of 1.00

In binary search, if the target element is less than the middle element, where does the search continue?

- a. In the left sublist ✓
- b. At the beginning of the list
- c. In the entire list
- d. In the right sublist

Question **15**

Correct

Mark 1.00 out of 1.00

What is searching in the context of computer science?

- a. Deleting elements from a list
- b. Sorting elements in a list
- c. Inserting elements into a list
- d. Determining whether an element is present in a list ✓
